the volume contains 94 best selected research papers presented at the third international conference on micro electronics electromagnetics and telecommunications icmeet 2017 the conference was held during 09 10 september 2017 at department of electronics and communication engineering bvit hyderabad college of engineering for women hyderabad telangana india the volume includes original and application based research papers on microelectronics electromagnetics telecommunications wireless communications signal speech video processing and embedded systems

the proceedings present some new topics and techniques of semigroup theory papers by leading experts in this theory are collected since results on semigroups have naturally been employed in formal languages and codes the focus is also on these directions

the need for a comprehensive survey type exposition on formal languages and related mainstream areas of computer science has been evident for some years if the early 1970s

when the book formal languages by the second quite feasible to write a comprehensive mentioned editor appeared it was still book with that title and include also topics of current research interest this would not be possible anymore a standard sized book on formal languages would either have to stay on a fairly low level or else be specialized and restricted to some narrow sector of the field the setup becomes drastically different in a collection of contributions where the best authorities in the world join forces each of them concentrating on their own areas of specialization the present three volume handbook constitutes such a unique collection in these three volumes we present the current state of the art in formal language theory we were most satisfied with the enthusiastic response given to our request for contributions by specialists representing various subfields the need for a handbook of formal languages was in many answers expressed in different ways as an easily accessible historical reference a general source of information an overall course aid and a compact collection of material for self study we are convinced that the final result will satisfy such various needs the theory of formal languages constitutes the stem or backbone of the field of science now generally known as theoretical computer science

the book comprises select proceedings of the first international conference on advances in electrical and computer technologies 2019 icaect 2019 the papers presented in this book are peer reviewed and cover wide range of topics in electrical and computer engineering fields this book contains the papers presenting the latest developments in the areas of electrical electronics communication systems and computer science such as smart grids soft computing techniques in power systems smart energy management systems power electronics feedback control systems biomedical engineering geo informative systems grid computing data mining image and signal processing video processing computer vision pattern recognition cloud computing pervasive computing intelligent systems artificial intelligence neural network and fuzzy logic broad band communication mobile and optical communication network security vlsi embedded systems optical networks and wireless communication this book will be of great use to the researchers and students in the areas of electrical and electronics engineering communication systems and computer science

this book comprises select proceedings of the international conference etaeere 2020 and primarily focuses on renewable energy resources and smart grid technologies the book provides valuable information on the technology and design of power grid integration on microgrids of green energy sources some of the topics covered include solar pv array hybrid microgrid daylight harvesting green computing photovoltaic applications nanogrid applications ac dc ac converter for wind energy systems solar photovoltaic panels pem fuel cell system and biogas run dual fueled diesel engine the contents of this book will be useful for researchers and practitioners working in the areas of smart grids and renewable energy generation distribution and management
